GNAQ (Q209L)

Catalog Number: 26328

Gene Symbol: GNAQ, CMC1, G-ALPHA-q, GAQ, SWS

Description: Anti-GNAQ (Q209L) Mouse Monoclonal Antibody

Background: GNAQ is a protein that in humans encoded by the GNAQ gene. The GNAQ protein, an alpha subunit in the Gq class, couples a seven-transmembrane domain receptor to activation of phospholipase C-beta. Mutations at this locus have been associated with problems in platelet activation and aggregation.

Immunogen: A synthetic peptide from the internal region of GNAQ which includes the

mutation of Q209L, human origin. **Tested applications:** ELISA, WB, IHC

Recommended dilutions:

ELISA: 1:1000-1:2000 WB: 1:500-1:1000 IHC: 1:50-1:100 Concentration: 1 mg/ml

Host: Mouse

Clonality: Monoclonal

Purity: Purified from ascites

Format: Liquid Storage buffer: Preservative: no

Constituents: PBS (without Mg²⁺ and Ca²⁺), pH

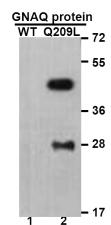

7.4, 150 mM NaCl, 50% glycerol

Species Reactivity: Recognizes Q209L mutant,

but not wild-type GNAQ of vertebrates. **Storage Conditions:** Store at -20°C. Avoid

freeze / thaw cycles.

Western blot:

WB: anti-GNAQ (Q209L) mAb

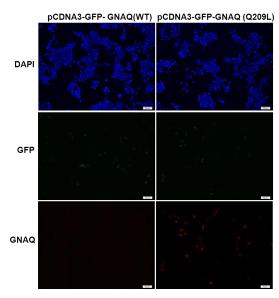

Western blot analysis of recombinant GNAQ (Q209L) and wildtype proteins. Purified His-tagged GNAQ (Q209L) protein (lane2) and corresponding wild-type protein (lane1) were blotted with anti-GNAQ (Q209L) monoclonal antibody (Cat. #26328).

Email:neweastbio@126.com Web:www.neweastbio.com.cn Tel:027-87561033

Immunofluorescence:

Immunofluorescence of cells expressing GNAQ proteins with anti-GNAQ (Q209L) antibody. HEK293T cells were transfected with pCDNA3-GFP-GNAQ (WT) plasmid (left column) or pCDNA3-GFP-GNAQ (Q209L) plasmid (right column), then fixed and stained with anti-GNAQ (Q209L) monoclonal antibody (Cat. #26328).
